Self-Adhesive Head Rubber Shock Pad

Overview

The HRSP Self-Adhesive Head Rubber Shock Pad is a rubber membrane designed to be placed on top of paving support pedestals, serving as an acoustic layer that reduces noise transmission through the system and prevents grit from causing grinding between the paver and pedestal head. The self-adhesive feature simplifies and accelerates installation.

- 1mm rubber layer
- Self-adhesive
- Available for each RYNO pedestal
- Enhances acoustic properties
- Eliminates the risk of grinding noise between pedestal and paver
