

SM

Stabilisation Mesh

Overview

The stabilisation mesh is a geonet made from PET. It is used to provide reinforcement whilst allowing filtration. It is installed beneath the Resin Bound Gravel kit to allow flexibility and mitigate cracking. It has a 25x25mm mesh, and has no memory effect allowing fast installation.

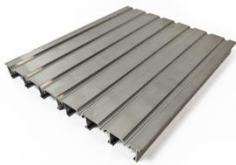

- Provides reinforcement whilst allowing flexibility
- 25x25mm mesh
- Quick and easy installation

Details

Material	PET (Polyethylene terephthalate), black
Dimensions	Supplied by m2 area
Mechanical properties	Ultimate tensile strength: >80kN/m bioaxial

Compatible components

	RBG Resin Bound Gravel kit		BB Baseboard
	BP Boundary Profile
